Van Wert, OH 18,800 sq. ft.

# Building on Your Vision

For years your ministry has been growing and has dreamt of expanding and reaching out to those in your community. One of the most significant steps in this process is *investing* in your church or ministry center, and it is very important to partner with someone who understands the process.

Borkholder Buildings has *experience* in helping hundreds of ministries over the past 50 years and can help make your project an *exciting* and *practical* solution. Along with our network of builders, we would like to join you in completing your project so you can continue to focus on your ministry.

Bluffton, IN 1,920 sq. ft.

Lexington, IL 24,300 sq. ft.

# Practical Solutions – Effective

As we enter the design phase, we think it is important to start with your ministry goals. Focusing on a *functional* and *versatile* facility is the first step and will provide a foundation for the remainder of the process. During the design process we make sure your structure is engineered

with appropriate loads and has the flexibility for future additions and expansions. An *attractive* building is always our goal, and our architectural and design services bring their skills to your project. While aesthetics are important, we do not overlook the need of designing

# Results

your facility with superior *energy efficiency*. This in turn allows you to use those additional funds that are saved on heating and cooling costs to further the growth of your ministry.

Carlock, IL 17,750 sq. ft.

Germantown Hills, IL 27,300 sq.ft.

## Your Plan in Action

Throughout the process of planning we do not forget the important aspects of financing and budgeting. Whether it is prints and floor plans for your committees or color renderings to assist in your fundraising, our design team is here to help. Having a ministry center that is *functional, attractive,* and *affordable* is a blessing and a testament to the faith of the ministry team, and we count it a privilege to be part of that.

Elmwood, IL 11,850 sq. ft.

*Our experience of working with Borkholder in building our new church facility was very positive. In our planning sessions, they listened to our needs and vision then designed a multi-use structure that was both functional and very affordable. The Borkholder team was easy to work with throughout the entire design and construction process. We use the new building seven days a week and are very happy with our choice.*
